All you need to know about CA Course

What is CA

Chartered Accountancy is a prestigious and rewarding profession that imparts the best technical skills in financial and management areas. Chartered Accountants today hold top management positions in public as well as private sector enterprises. They also render professional services as financial experts, accountants and management consultants to various private and public sector organizations. The Institute of Chartered Accountants of Nepal (ICAN) is an autonomous body and is fully authorized by the Act to regulate accountancy profession in Nepal. CAs are currently being accepted as business leaders who can take up roles beyond auditing and financial management. Despite the emerging charm and scope in CA profession, the number of Chartered Accountants in Nepal is very low to meet the demand of market in the present scenario.
